

Umbra in Salem

COMMEMORATIVE PUZZLE

TETON CRAFT WORKS

TRITONE 13 piece

The Great American Eclipse

On August 21, 2017 a TOTAL SOLAR ECLIPSE will occur at 10:17AM (PDT). The shadow cast from the moon is conical in shape. The tip of the shadow is about 70 miles wide and is called the PATH OF TOTALITY. Nashville, Tennessee is in that path. Umbraphiles from all over the world will converge to bask in the 'UMBRA' (Latin for shadow) of the moon.

During the full eclipse one will be able to look at the sun with the naked eye, which will be entirely blocked by the moon. What will be visible is the corona of the sun; jets of plasma leaping high into space.

6" radius : material - 1/4" thick - tritone hardwood (walnut, poplar and wenge) : engraved

Wholesale Price: \$14.75
